

User Stories Review

TAHIRELSHAZLI.COM PLATFORM

Date: Tuesday, 30 July 2026

Meeting Type: Reviewing User Stories

Prepared by: Ali Esam

Overview

In this session, the prepared user stories for the Tahirelshazli.com platform were presented to the client for review. The client was provided access to the full user stories board via the link below.

User Stories Board (Figma): <https://www.figma.com/board/R17s0ASEJqQ7iQC2LeyFFK/Tahirelshazli.com---User-Stories?node-id=0-1&p=f&t=0tkm536gHmOwfA8q-0>

Client-Requested Changes

The client, Dr. Tahir, reviewed the user stories and requested the following modifications:

1. Assistant Activity Visibility

The admin and the main teacher (Dr. Tahir) must be able to see which assistant performed a specific action — whether it was a change to an assignment, a quiz modification, a content upload, or any other recorded activity within the platform.

2. Sequential Lesson Lock — Configurable Toggle

Students are required to complete a lesson before the next one becomes accessible. The client requested that this behaviour be made configurable, allowing the admin to enable or disable the sequential lock at any time via an on/off toggle.

3. Grade Averages Per Student and Overall

The platform must display the average assignment mark and the average quiz mark for each individual student, as well as aggregated averages across all students combined.
